Press-Release

Citilog signs a new Value-Added-Reseller in Vietnam!

September 9, 2020

Established since 2009, with more than 10 years of experience, Tri Nam became one of the leading enterprises providing and developing IT products in Vietnam, including Intelligent Transport System (ITS) solution such as TMS, MTC, ETC, WIM, VMS, MET, VDC, CCTV and Bus Information.

Citilog and Tri Nam have signed a new Value Added Reseller agreement, which covers the sales and installation of Citilog solutions in Vietnam.

We are delighted to officially announce this partnership, the visible results of several months of successful technical and commercial collaboration which has already materialized in a first successful implementation of the technology in Vietnam.

We welcome Tri Nam in the Citilog VAR program and look forward for a fruitful collaboration.

About Citilog

Through video-based traffic management solutions for smarter mobility, Citilog contributes to roads where traffic moves safely and more freely.

Ideally combined with Axis camera technology, Citilog traffic expertise enhances safety and traffic flow, which simplifies decisions and allows more to be done with existing infrastructure.

Citilog is an Axis Communications group company.

By automatically detecting disturbances and supplying relevant real-time traffic data, Citilog solutions make each stage of the incident management chain more effective.

By maximizing the potential in existing traffic infrastructure, Citilog solutions help minimize congestion, gridlock and environmental impact.

By automatically detecting traffic offenses, Citilog solutions reduce the time and resources needed to identify violations and collect fines.

By making it easy and economical to collect and manage traffic data, Citilog solutions expand the possibilities for real-time and long-term traffic improvement.
